PRIMING SUCCESS

MODULE PODS PRIME WORK COMMUNITIES FOR SUCCESS

THE WORK ENVIRONMENT MUST SUPPORT THE EMPLOYEES' NEEDS

A NOISY WORK ENVIRONMENT, difficulty focussing and lack of privacy are part of day-to-day life in many work environments. The more open the space is, the more these challenges are highlighted.

Disruptions significantly weaken work efficiency.

It takes around 15 minutes to regain one's focus after being interrupted.

In open-plan offices, disruptions steal an average of three hours of work efficiency from an employee every week – that adds up to 12 hours a month and nearly one month a year.

THE WORK ENVIRONMENT MUST SUPPORT THE EMPLOYEES' NEEDS

BESIDES INTERRUPTIONS, fragmented days are typical of today's work. Days are filled with meetings, haste and long to-do lists.

Work tasks must often be completed efficiently and quickly in between meetings.

In order to succeed in a modern work environment, employees need spaces that allow them to focus on their work when they need to.

Module pods are designed for efficient work – whether it's a phone call, a meeting or taking care of an important task.

MODULE PODS PRIME WORK COMMUNITIES FOR SUCCESS

MODULE OFFERS peaceful and pleasant conditions for productive work, even in the busiest of environments.

Module pods are soundproof, well-ventilated and have good lighting and acoustics, providing the optimal conditions for focused work – without worrying about being interrupted or distracted by others.

Module pods combine Finnish design with decades of experience in technical engineering and implementing work environments. The result is an efficient space that enables working, collaborating and focussing and creates a framework for succeeding in modern working life.

MODULE PODS WERE DESIGNED BY AWARD-WINNING INTERIOR ARCHITECT AND DESIGNER ESA VESMANEN

MODULE WAS DESIGNED by Esa Vesmanen, winner of the internationally acclaimed Red Dot Design Award for his Finom lamp design and the Good Design Award from The Chicago Atheneum for his Balance Acoustic Chair. In 2008, Vesmanen was named Interior Architect of the Year in Finland.

In Module spaces, the collaboration between Vesmanen and the manufacturer Muotolevy Module is a combination of special expertise: Finnish design and decades of experience in executing work environments.

“Hectic days and restless work environments easily make work chaotic. I believe that users of Module pods can focus and succeed in their work even in all the hustle and bustle.”

– Esa Vesmanen

SPACES BASED ON NEEDS

WE EMPOWER SUCCESSFUL WORK COMMUNITIES

MODULE SOLO, DUO and TEAM are spaces of different sizes that allow any office to be equipped with the required number of easily accessible quiet spaces.

All Module pods are provided with acoustic ambience, efficient ventilation for fresh air, and glare-free, indirect lighting.

Module spaces furnished with the intended purpose in mind are ideal for any work task that requires peace, quiet and privacy.

MODULE SOLO

MODULE SOLO

PRIVACY AND CONCENTRATION FOR PHONE CALLS

Module blocks out the background noise in open-plan offices and lobby spaces and allows users to focus in hectic work environments.

Efficient ventilation ensures fresh air and clear thoughts. The indirect lighting is designed to be glare-free to ensure the space is pleasant to work in.

Examples of uses:

Phone booth, video calls, writing tasks
